(1) "Draw-down" is defined as losses experienced by a pool or an account over a specified period.		
(2) "Worst peak-to-valley drawdown" is defined as the greatest cumulative percentage decline in month end net asset value due to losses sustained by a pool, account or trading program during any period in which the initial month-end net asset value is not equaled or exceeded by a subsequent month-end net asset value.		
(3) "Year-To-Date" represents the compounded rate of return for each year or portion of the year presented. It is computed by applying successively the respective Monthly Rate of Return beginning with the first month of that year. The calculation assumes a continuous investment throughout the period. <u>To illustrate the affects of compounding monthly rates of return, refer to the VAMI analysis below.</u>
